Native Human Kallikrein Biotin

Catalog No. CNH007A **Quantity:** 100 µg
CNH007B 1 mg

Alternate Names: KLKR

Description: Activation of Prekallikrein with Factor alpha-XIIa produces the enzymatically active Kallikrein. Kallikrein is a serine protease which consists of a heavy chain (Mr 52kD) and light chains (Mr either 36 or 33 kD) linked by disulfide bridges. Kallikrein possesses enzymatic activity toward Factor XII, HK, Plasminogen, Factors XI, IX, and VII, prorenin and the complement system. After activation, the activating enzyme Factor XIIa is removed by affinity chromatography.
Active Native Human Kallikrein is biotinylated on lysine residues.
