

MUC16

Native Human Cancer Antigen 125 Protein

Catalog No.	CSI19626A	Quantity:	10 kU
	CSI19626B		20 kU
	CSI19626C		50 kU

Alternate Names: cancer antigen 125, ovarian carcinoma antigen 125, mucin 16, MUC16, CA125

Description: Human Cancer Antigen 125 (CA-125) is one of the largest members of the mucin family of glycoproteins. It is a membrane-associated protein that can be released from the cell surface by undergoing proteolytic cleavage. CA-125 may be elevated in the blood of patients with specific types of cancers or other benign conditions. CA-125 is the most frequently used biomarker for ovarian cancer detection.

Gene ID: 94025

UniProtKB: Q8WXI7

Source: Human Ascites Fluid

Activity: ≥ 100 kU/mL (EIA)

Formulation: Liquid in PBS, pH 7.4, 3% sucrose, 0.05% sodium azide.

Purity: >95% by SDS-PAGE

Contaminants: Low Cross Contamination: CA 15-3, CEA, CA 19-9

Storage & Stability: Store in aliquots at -20 °C. **Avoid repeated freeze-thaw cycles.**

Statement: Non-infectious disease statement: negative or non-reactive at the donor level for HIV 1 and 2 (antibodies or NAT), HCV (antibodies or NAT), and HBsAg. However, because no test method can offer complete assurance that infectious agents are absent, this material should be handled at the Biosafety Level 2 (BSL 2) as recommended for any potentially infectious human serum or blood specimen in the CDC/NIH manual "Biosafety in Microbiological and Biomedical Laboratories", 2009.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
