

Rat Anti-Conjugated Gibberellic Acid pAb

Catalog No.	PA2121	Quantity:	100 µl
Description:	Rat Anti-conjugated Gibberellic Acid polyclonal antibody consists of 1.0 mg total IgG and 0.1 mg antigen specific IgG		
Specificity:	Conjugated Gibberellic acid		
Host:	Rat		
Immunogen:	Synthetic Gibberellic acid conjugated to protein carriers		
Isotype:	IgG		
Formulation:	Lyophilized		
Purification:	IgGs were purified from antiserum that had been pre-absorbed against BSA.		
Reconstitution:	Centrifuge vial prior to opening. It is critical to use the following sequence when reconstituting this antibody: dissolve antibody in 50 µl sterile distilled water, and then add 50 µl glycerol.		
Storage & Stability:	Store lyophilized antibody at 2-4°C in a dry area. Reconstituted antibody is stable for 2 years in working aliquots at -20°C. Avoid repeated freeze-thaw cycles.		
Also Available:	Corresponding antigen: Gibberellic (BSA) conjugate (Cat. No. AG087).		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
