

Mouse TNF-alpha ELISA Matched Antibody Pairs

Catalog No: CK1093
Size: 10 plate format

Coating antibodies (2 vials)

Product: Polyclonal antibody to mouse tumor necrosis factor alpha (TNF-alpha)
Isotype: Rabbit IgG
Purification: Ammonium sulfate precipitation, protein A- and ligand-affinity chromatography
Contents: Each vial contains sufficient material for coating of five 96-well ELISA plates
Buffer: Prior to lyophilization: 0.25 ml PBS + 125 mM trehalose
Application: Coating antibody in an ELISA system
Reconstitution: Dissolve the contents of one vial by injection of 0.25 ml distilled water into the vial and dilute 100 times in PBS. The total amount of one vial is sufficient for five 96-well ELISA plates (480 determinations; 50 µl/well).

Detection antibodies (2 vials)

Product: Biotinylated polyclonal antibody to mouse tumor necrosis factor alpha (TNF-alpha)
Isotype: Rabbit IgG
Purification: Ammonium sulfate precipitation, protein A- and ligand-affinity chromatography
Labeling: With Biotin-7-NHS (N-hydroxysuccinimide)
Contents: Each vial contains sufficient material for five 96-well ELISA plates
Buffer: Prior to lyophilization: 0.5 ml PBS + 1% BSA + 125 mM trehalose
Application: Detection antibody in an ELISA system
Reconstitution: Dissolve the contents of one vial by injection of 0.5 ml distilled water into the vial and dilute 100 times in PBS + 0.5% BSA + 0.05% Tween-20. The total amount of one vial is sufficient for five 96-well ELISA plates (480 determinations; 100 µl/well).

Standards (5 vials)

Product: E. coli-derived recombinant mouse tumor necrosis factor alpha (TNF-alpha)
Application: Cytokine standard in an ELISA system
Reconstitution: Dissolve the contents of one vial by injection of 0.5 ml distilled water into the vial and use immediately.

General

Specificity: Validated for detecting natural and recombinant mouse TNF-alpha.
Sterility: Membrane filtered (0.2 µm)
Stability: The lyophilized products are stable for more than one year at 4°C. After reconstitution, the antibodies are stable for several months at 4°C (if kept sterile) or for at least one year at -20°C. The reconstituted standard preparation should be used immediately.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
