Mouse Anti-Mouse Immunoglobulin G2a kappa Isotype Control Clone MOPC-173 Biotin Antibody

Catalog No.	CSI11885 CSI11886	**Quantity:**	50 µg 200 µg

Description: The MOPC-173 immunoglobulin has unknown specificity. The isotype of this antibody is Mouse IgG2a,κ. This antibody was chosen as an isotype control after screening on a variety of resting, activated, live, and fixed mouse, rat and human tissues.

Concentration: 0.5 mg/ml

Host: Mouse

Isotype: Mouse IgG2a, κ

Clone: MOPC-173

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide. **Precaution:** Sodium azide is a poisonous and hazardous substance which should be handled by trained staff only.

Purification: The antibody was purified by affinity chromatography, and conjugated with biotin under optimal conditions. The solution is free of unconjugated biotin.

Applications: FC, ICFC

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis as negative control. It is recommended that the reagent be titrated for optimal performance for each application.

Storage & Stability: The antibody solution should be stored undiluted at 4°C. **Do not freeze.**

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
