

Human Ascites Fluid, Single Donor

Catalog No.	CSI19632A	Quantity:	25 ml
	CSI19632B		500 ml
	CSI19632C		1 liter

Description: Ascites, also known as peritoneal cavity fluid, peritoneal fluid excess, hydroperitoneum, is an accumulation of fluid in the peritoneal cavity. Although most commonly due to cirrhosis and severe liver disease, its presence can portend other significant medical problems. Diagnosis of the cause is usually with blood tests, an ultrasound scan of the abdomen, and direct removal of the fluid by needle or paracentesis.

Source: Peritoneal fluid from a single donor with lung cancer.

Appearance: Clear to pale yellow.

Formulation: Frozen Liquid - unprocessed without preservatives

Storage & Stability: Store at -20°C to -80°C. Recommended upon initial thaw to prepare working aliquots and store at -20°C to -80°C. **Avoid multiple freeze/thaw cycles.**

Certification: Non-Infectious Disease Certification: Non-reactive for HIV-1/HCV/HBV by NAT; Syphilis, HBcAg, HBsAg, HCV Ab, HIV-1&2 Ab and RPR by currently approved FDA methods. However, because no test method can offer complete assurance that infectious agents are absent, this material should be handled at Bio-Safety Level 2 (BSL 2) as recommended for potentially infectious human serum or blood specimen in the CCD/NIH manual "Biosafety in Microbiological and Biomedical Laboratories", 1999.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
