

## AFP

### Rabbit Anti-Human alpha-Fetoprotein / AFP pAb

<b>Catalog No.</b>	PS351	<b>Quantity:</b>	0.1 mg
<b>Alternate Names:</b>	AFPD; FETA; HPAFP		
<b>Description:</b>	This antibody is directed against human alpha-Fetoprotein established in numerous immunized rabbits. Rabbits were immunized with pure human alpha-fetoprotein (98% AFP) Rabbit antiserum was pre-absorbed by incubation with immobilized protein fractions of human plasma. Absorbed antiserum was applied to immobilized human alpha-fetoprotein. Affinity purified antibody (95% Rabbit IgG) was mildly eluted from the sorbent.		
<b>Gene ID:</b>	174		
<b>UniProt ID:</b>	P02771		
<b>Specificity:</b>	Human alpha-fetoprotein		
<b>Host:</b>	Rabbit		
<b>Isotype:</b>	IgG		
<b>Immunogen:</b>	Human alpha-fetoprotein (98% pure)		
<b>Formulation:</b>	Lyophilized, may contain traces of mannitol, dextran and buffer salts.		
<b>Purity:</b>	>95% rabbit IgG		
<b>Purification:</b>	Rabbit antiserum was pre-absorbed by incubation with immobilized fractions of human plasma. The pre-absorbed fraction was then affinity purified on immobilized human alpha-fetoprotein.		
<b>Reconstitution:</b>	Centrifuge vial prior to opening. Add 1 mL sterile distilled water.		
<b>Applications:</b>	ELISA, IHC		
<b>Storage &amp; Stability:</b>	Store as supplied at 2-8 °C for up to one year. Upon reconstitution, store antibody at 2-8 °C for up to two weeks or in working aliquots at -20 °C to -80 °C for one year. <b>Avoid repeated freeze-thaw cycles.</b>		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
